

D2C Fashion Brand: 300% ROI via Paid Search Restructure

How a fragmented Google Ads account was transformed into a high-performance paid search engine – delivering a **4.8x ROAS** and 300% ROI increase through structural discipline, smart automation, and feed optimization.

CASE STUDY

PAID SEARCH

SA360

The Challenge: A Fragmented Account Bleeding Budget

Before the engagement, the account was structurally broken – spending aggressively with little return. Three core dysfunction areas were identified that were actively suppressing performance.

40+ Fragmented Campaigns

Overlapping keywords across campaigns caused internal auction competition, driving up CPCs without incremental reach. No clear segmentation existed between branded and non-branded intent.

34% Wasted Spend

A full account audit revealed that over a third of total budget was flowing to non-converting search terms – a direct drain on ROAS with no path to attribution.

Manual Bidding at Scale

With no automated bid strategy in place, campaign management was reactive and time-intensive. ROAS had plateaued at **1.2x** and CPA was trending upward month-over-month.

The Approach: A Five-Point Restructure

Funnel-Stage Architecture

Campaigns were rebuilt around prospecting, mid-funnel, and retargeting intent – with SKAG-style ad groups for top revenue product categories, eliminating keyword cannibalization.

SA360 Portfolio Bid Strategies

Manual bidding was migrated to SA360 Target ROAS with portfolio-level bid strategies, layered with customer lifetime value signals to prioritize high-value audience segments. Shopping feed quality was overhauled – 200+ product titles rewritten with high-intent keyword research to improve GMC data quality and Shopping auction eligibility.

Results: From 1.2x to 4.8x ROAS

The restructure delivered compounding gains across every key performance dimension – validating both the structural and automation-led approach.

4.8x

Final ROAS

Up from 1.2x at engagement start – a **300% ROI increase** across the full engagement.

20%

CVR Lift

Conversion rate improvement driven by funnel-stage campaign alignment and audience segmentation.

60%

Time Saved

Reduction in manual campaign management time via SA360 automation and portfolio bid strategies.

34%

Waste Eliminated

Of total spend recovered from non-converting search terms and branded/non-branded cannibalization.
